The MVP is here...

BUY a TOKEN...

Program a Car...

It's that simple...

MULTI VEHICLE PROGRAMMER

MVP KEY PROGRAMMING SYSTEM

MVP (Multi Vehicle Programmer) is the new Key Programming System from Advanced Diagnostics which is based on the Worlds premier Key Programming System, AD100, but with an extremely small purchase price, and the ability to pay as you go for key programming.

The World Leaders in Transponder Key Programming have again led the way and raised the benchmark with the revolutionary 'Pay As You Go' key programming system, using electronic tokens which can be purchased easily and quickly on the internet.

The MVP is supplied with all available software applications and easily updated with new software from the internet, at no cost, ensuring the technician always has the latest developed software.

This NEW system uses electronic tokens to program vehicles, one token per vehicle, and along with never having to purchase software again allows anyone who wants to offer key programming a step in the door ... at a price any security professional can afford.
